

LIMITED  
TIME OFFER

Until the end of September, SYNEX is offering a Very Special Deal on an **entry-level** DataVault Jobsite Technology Bundle!

### Speed and technology drive the modern jobsite.

The DataVault Technology Bundle combines these elements with the mobility and security of a rugged field box holding digital tools to enable contractors to get the job done right and on time.

As a mobile workstation providing drawing mark-up software, ruggedized tablet computing and immediate data connectivity without the need for IT infrastructure at the site, DataVault enables construction workers to leverage technology to realize greater efficiencies and double productivity.

Having access to current project information within feet of the actual work reduces mistakes and increases confidence in the process.

Proximity to the work and faster access to project data allows on-site managers to spend a much higher percentage of their time on the jobsite, not in transit or in the trailer
